

DATA ANALYTICS WITH TABLEAU ASSIGNMENT

Sheet-01: Area Chart

- There will be **data pane** in left side, drag **Order Date** and put it in the columns shelf.
- After right click on the **YEAR (ORDER DATE)** on the columns shelf.
- Then select **month**.
- In data pane, drag **QUANTITY** to the rows shelf.
- Drag the **Ship mode** to the marks card and add color on the marks card.
- On the **mark card**, select the drop-down menu and select the area the chart type.

OUTPUT:

Sheet- 02: Bar Chart

- To rows shelf, drag **sales** and place it.
- In tableau sales will be **SUM (Sales)** automatically aggregates
- Then **Order Date** is used, Tableau first shows a **LINE CHART** which is representing yearly sales trends.
- Click the drop-down menu on the **marks card**.
- Then select **Bar**.

Add the SHIP MODE COLORS

- Drag **ship mode** to the marks card.
- Drag the Region and place it in the Rows shelf on the left of sales.
- Filter only **WEST REGION**.
- Again drag the **region** to the filters shelf.

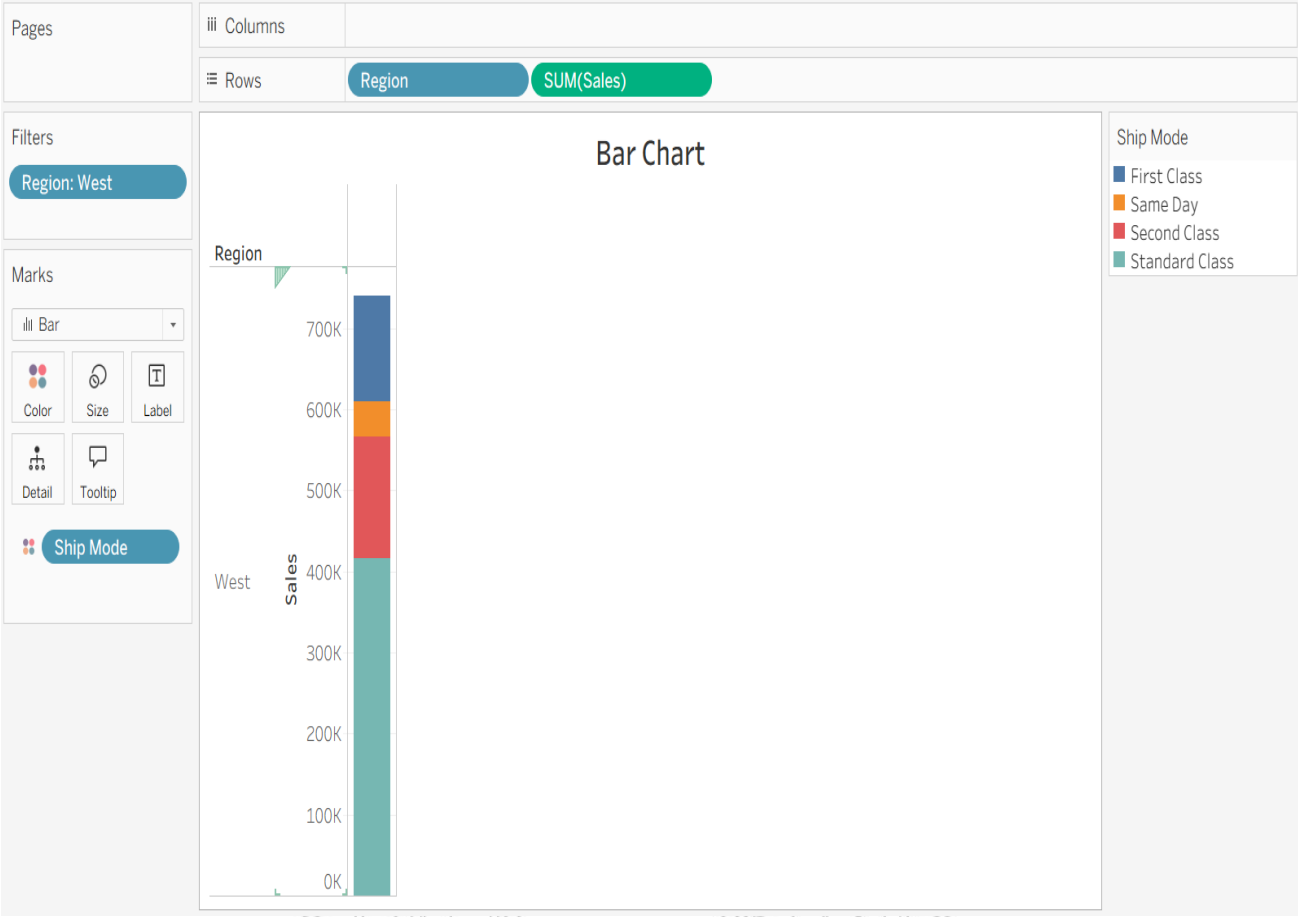

In filter dialog box:

- Uncheck **Central**
- Uncheck **East**
- Uncheck **South**
- Keep only **West**
- click ok [done]

OUTPUT:

BRAVO
- BUILDERS -

BRAVO

— BUILDERS —

Sheet – 03: Box Plot

- Drag the **segment**, place it in the **columns shelf**.
- Drag the **Discount**, place it in the **Rows shelf**.

Change Aggregation to Average

- On the Rows shelf, **click Discount**.
- Then hover over **Measure (Sum)** and change the aggregation to Average.

Adding Region

- Drag **region** to columns shelf. dropping it right of segment.

Covert to box plot

- click **show me** in toolbar.
- Then select **box-and-whisker plot**.

Now change columns shelf layout

- Drag **Region** from **Marks card** back to columns shelf, right of segment.

Disaggregate Date

- Now go to **analysis** and uncheck Aggregate Measure.

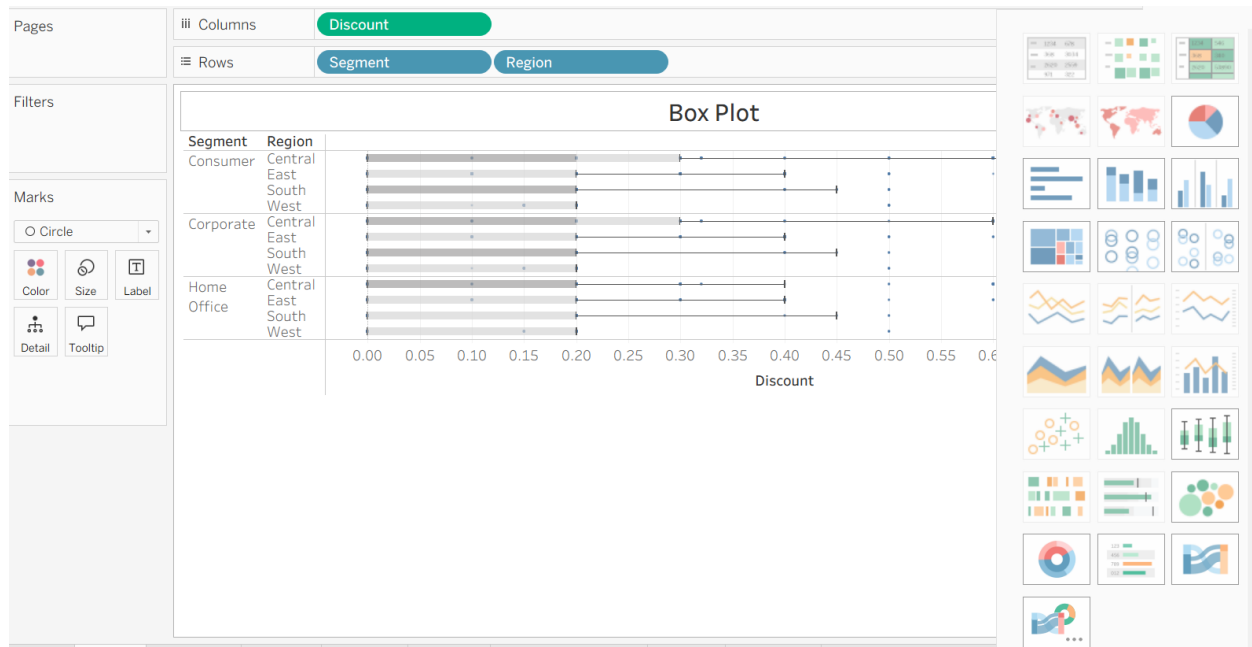

Swap Axes (Horizontal View)

- Now click swap rows and columns button (**Ctrl+ W**).

OUTPUT:

BRAVO
– BUILDERS –
—

BRAVO
— BUILDERS —

Sheet – 04: Gantt Chart

- Add **Order date** to columns.
- Tableau automatically shows it as **YEAR(Order Date)**.
- Now click on the **year** and change it to week number.
- Now it will be the **weekly** timeline chart.
- Drag **sub-category** to the rows shelf.
- Drag **ship mode** to rows shelf then place it right side of the sub-category

Now rows will shows as

-  Furniture first class Standard class etc.....
- In marks card select Gantt chart.
- Now small thin bars appear across timeline.
- Now next step, go to **analysis**.

Create calculated Field

- To create a calculated Field Name: **OrderUntilShip**.
- By using formula of **DATEDIFF('day', [Order Date],[Ship Date])**.
- And click okay or apply.

Add Delay to size

- Next, drag **OrderUntilShip** to size on the marks card.
- Now bars will become longer based on shipping days.

Change to sum to Avg

- on mark card right click on **SUM(OrderUntilShip)** and select measure to average.

Add colors by ship mode

- Now drag **ship mode** to color in the mark card.
- And now ship mode gets different color.

OUTPUT:

Sheet – 05: Heat Map

Adding Segment

- Drag **segment** to columns shelf.
- Now you will see.
 - 📊 Consumer
 - 📊 Corporate
 - 📊 home office

Adding Region and sub category to Rows

- Drag **Region** to rows shelf.
- Drag **sub-category** to row shelf and place it beside right of region.

Now hierarchy becomes:

- 📊 Central ----> Chairs, Tables, Phones etc.
- 📊 East
- 📊 South
- 📊 West

Add profit to color

- Drag profit and drop it in the marks card on color.

Now Tableau colors cells based on profit.

- 📊 High profit = Blue/ Dark
- 📊 Loss = Orange

Add Border to Cells

- Now adding border to cells by click color on **mark card**.
- Click down arrow and select Edit color.
- Then under **Border**, choose **medium gray** to make each box clearer.

Change the color palette

- On profit color legend click dropdown arrow.

- Select Edit color.

In the dialog box:

- chose palette ---->Red-black diverging.
 - check Use full Color Range and click Apply on Okay.
- Now the profit = black/dark.
- And loss = red.

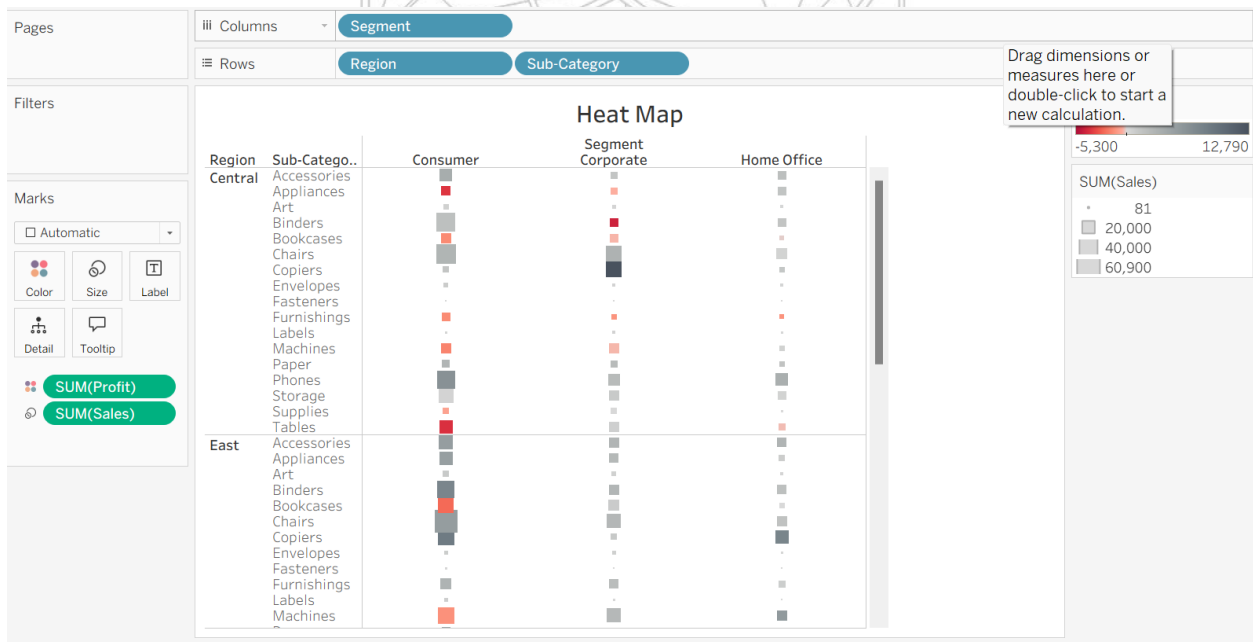

Add Sales to Size

- Drag **Sales** and drop it on the **SIZE** in the marks card.
- Now the box size represents sales amount.
 - Large box =high sales
 - Small box =low sales

Increase size

- click **size** on marks card and move it slider to right until the boxes.
- Fit properly in the **chart** to get output.

OUTPUT:

Sheet – 06: Histogram

- Drag **QUANTITY** and place it on columns shelf.

Create Histogram Using show me

- On top right corner, click **show me** and select Histogram.

Now tableaus will automatically does :

- On columns creates **Quantity (bin)**.
- **Quantity** will moves to Rows.
- **CNT (QUANTITY)** changes aggregation.

Understand Histogram

- Now **X-axis**: quantity.
- **Y-axis**: count of orders.

Example:

- Around 2400 Orders had quantity = 4
- Around 4800 Orders had quantity = 2

Add segment to color

- Drag **segment** from dimensions and drop it on color in **marks card**.

Now bars becomes stacked by show as

📊 Consumer

📊 corporate

 Home office

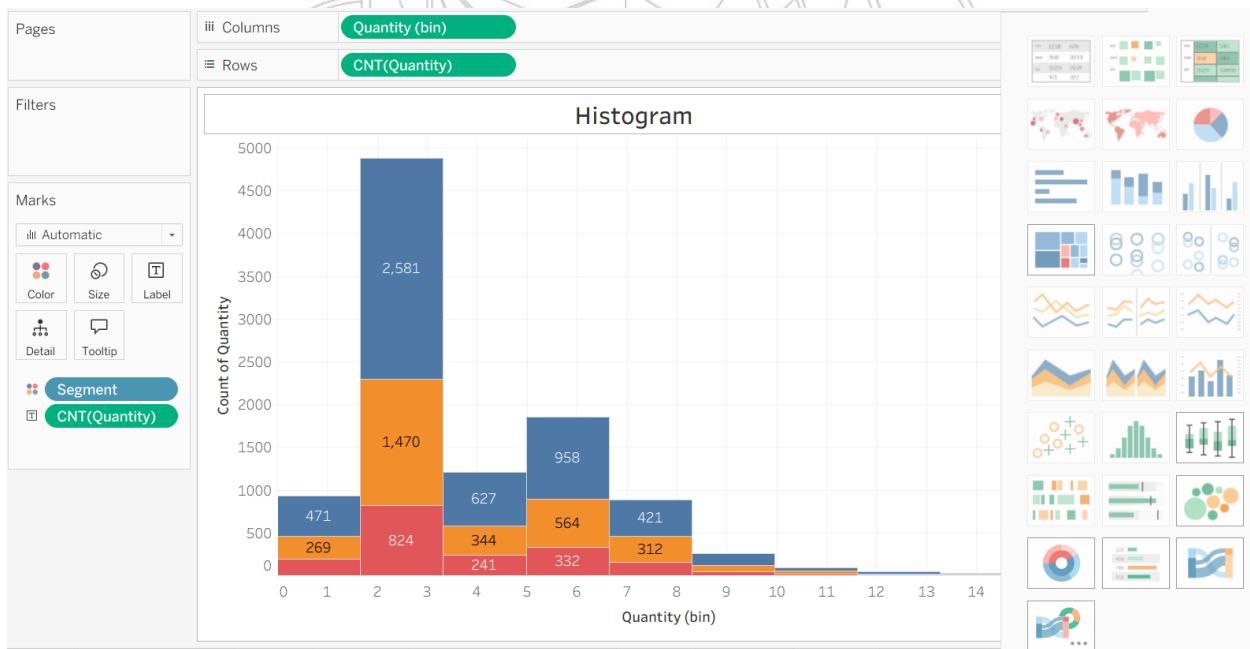

Copy Count to Label

- Drag CNT(Quantity) from rows shelf to label by using Ctrl.

Convert labels to percent of Total

- On mark card right click **CNT(Quantity)**.
- Then select **quick table calculation to percent of total** now labels show percentages.

Output:

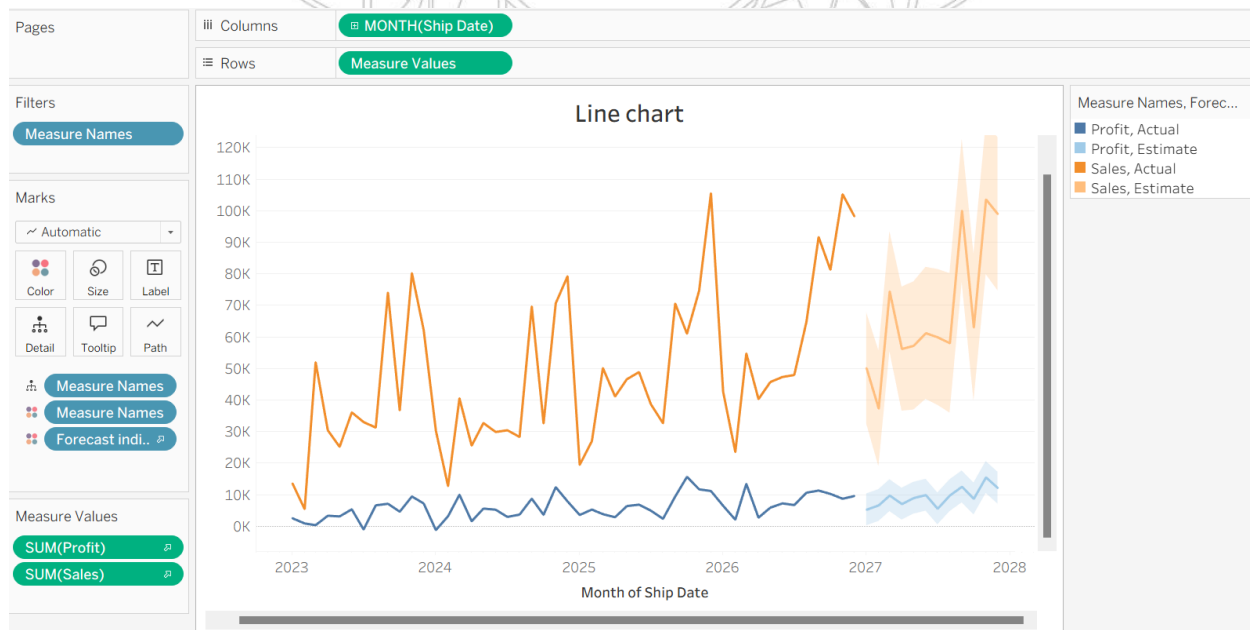

BRAVO
- BUILDERS -

Sheet – 07: Line Chart

- Drag **ship Date** and place it on **columns shelf**.
- Tableau shows: **YEAR (SHIP DATE)**.
- Now drag **sales** and place it on the **rows**.
- Then a **line chart** will be appear.
- Drag **profit** and drop it in the **rows shelf**, right side of the **sales**.
- Tableau creates two separate axes:
 - ✚ Sales axis
 - ✚ Profit axis
- Drag **SUM(Profit)** from Rows shelf.
- And then drop directly on the **sales axis**.
- Now **profit** and **sales** share **same axis**.
- Repeating yearly spikes Seasonal business growth And this is called **seasonality**.
- In columns shelf **click month** and change it to the **year**.
- Then go to **analysis pane** and add **forecast into chart area** and next change it back year to month.

OUTPUT:

Sheet – 08: Packed Bubbles

- Adding **category** to columns shelf.

Now, you will see:

- ✚ Furniture
- ✚ Office supplies
- ✚ Technology

Add Sales to Rows

- Drag **sales** and place it on the **Rows shelf**.
- **Bar chart** created by default.

Change to Packed Bubbles

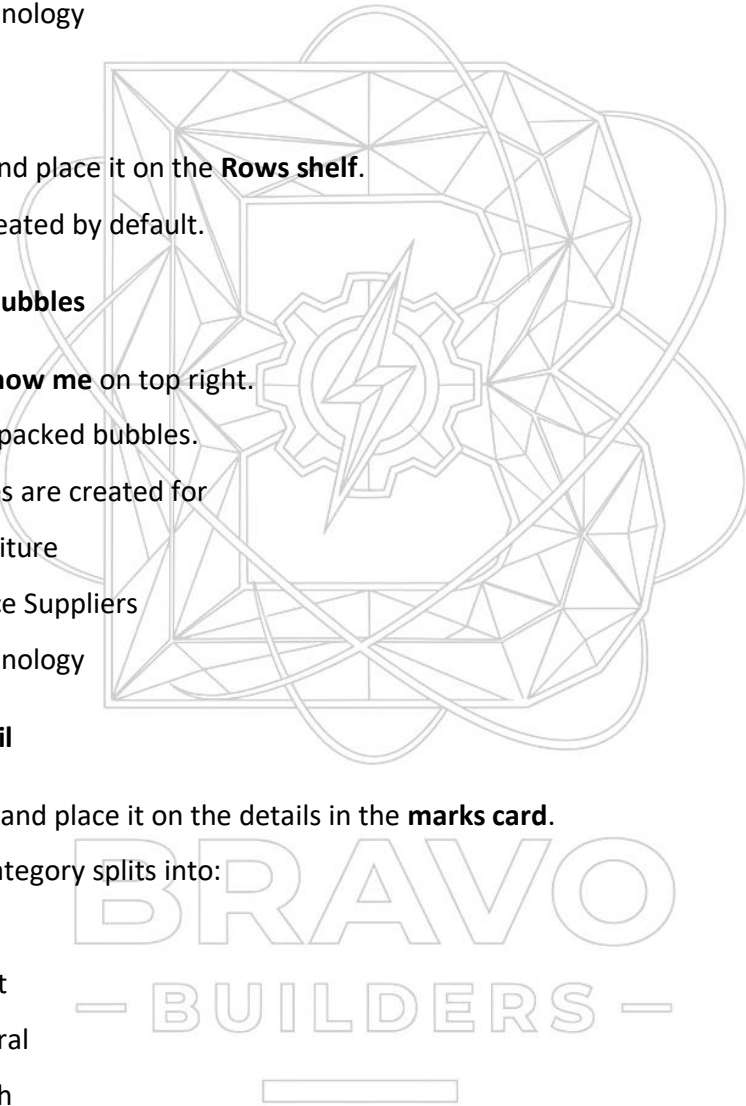

- Select the **show me** on top right.
- Then **select** packed bubbles.
- Then bubbles are created for
 - ✚ Furniture
 - ✚ Office Suppliers
 - ✚ Technology

Add Region to Detail

- Drag **region** and place it on the details in the **marks card**.
- Now each category splits into:
 - ✚ East
 - ✚ West
 - ✚ central
 - ✚ south
- Now more bubbles will appear.

Add profit to color

- Drag **profit** and place it in the **color**. Now bubble color represents profit

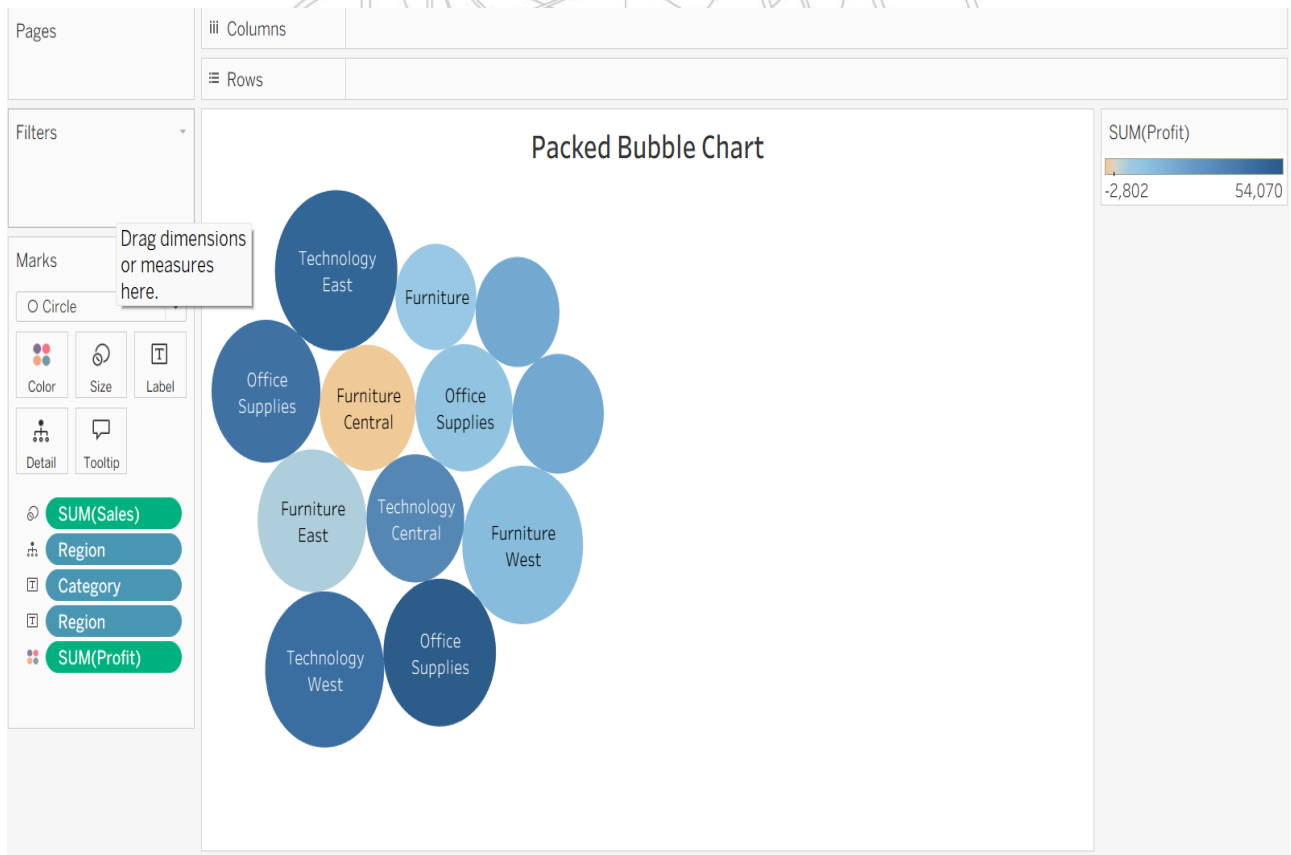

Example:

- Dark blue =High profit
- Light blue =Lower profit
- Orange/Red(If palette changed) = Loss

Add Region to Label

- Drag **region** and drop it to label on **marks card**.
- Now **each bubble** displays **region name**.

Output:

Sheet – 09: Pie Chart

- Drag **profit** and place it on the **columns shelf**.
- Now drag **category** and place it on the **Rows shelf** It creates a **Bar chart** by default.
- Click on **show me** and select the **pie chart**.
- After selecting **pie chart**, Mark the type changes to **pie**.

Sum(profit) moves to:

 Angle

 Size

Category move to

 Color

Now increase Pie chart:

- Select **Entire view**.
- Now, click **size** on marks card move slider right.
- Now the **pie chart** becomes larger.

Add labels

- Drag **category** and place it on the **label** on marks card.

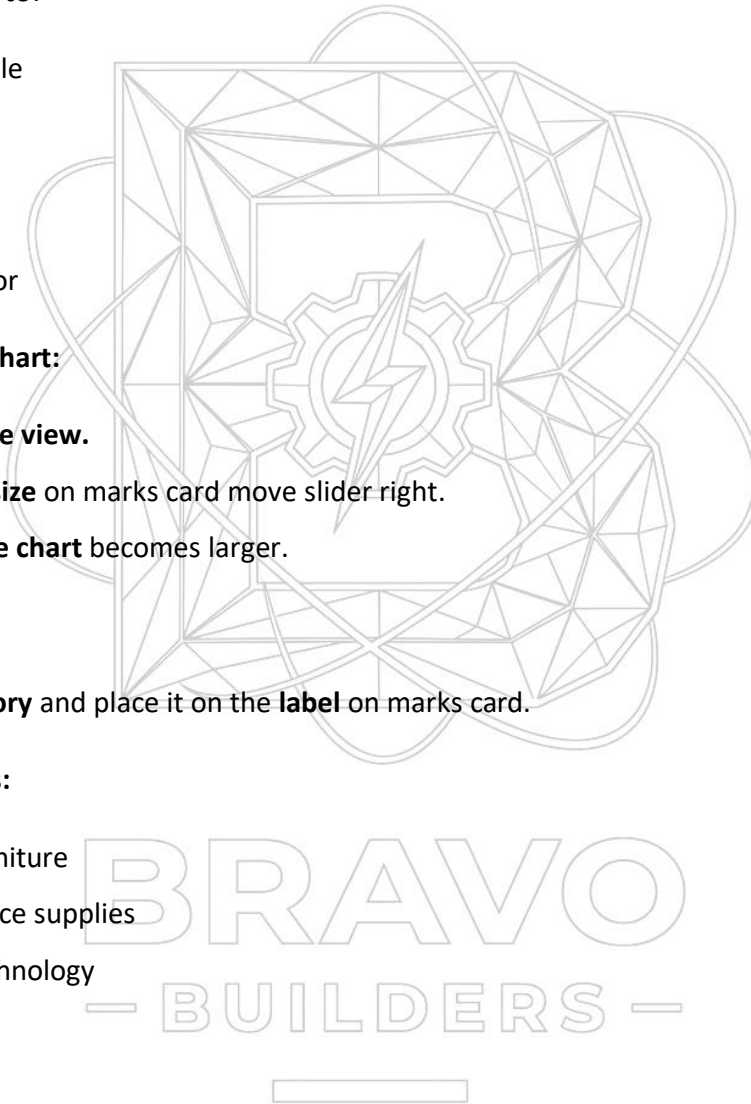

Now chart displays:

 Furniture

 Office supplies

 Technology

OUTPUT:

BRAVO
- BUILDERS -

Sheet – 10: Scatter Plot

- Drag **sales** and place it on the **columns shelf**.
- Now, tableau creates **horizontal axis**.
- Drag **profit** and place it on the **Rows shelf**.
- Now, tableau creates **vertical axis**.
- Now, you get one **mark scatter plot**.

Add Category to Color

- Drag **category** and place it on the color in **marks card**.

Now marks split into:

- ✚ Furniture
- ✚ Office supplies
- ✚ Technology
- Each category gets different color.

Add Region to Detail

- Drag **region** and drop it on **details** in marks card.

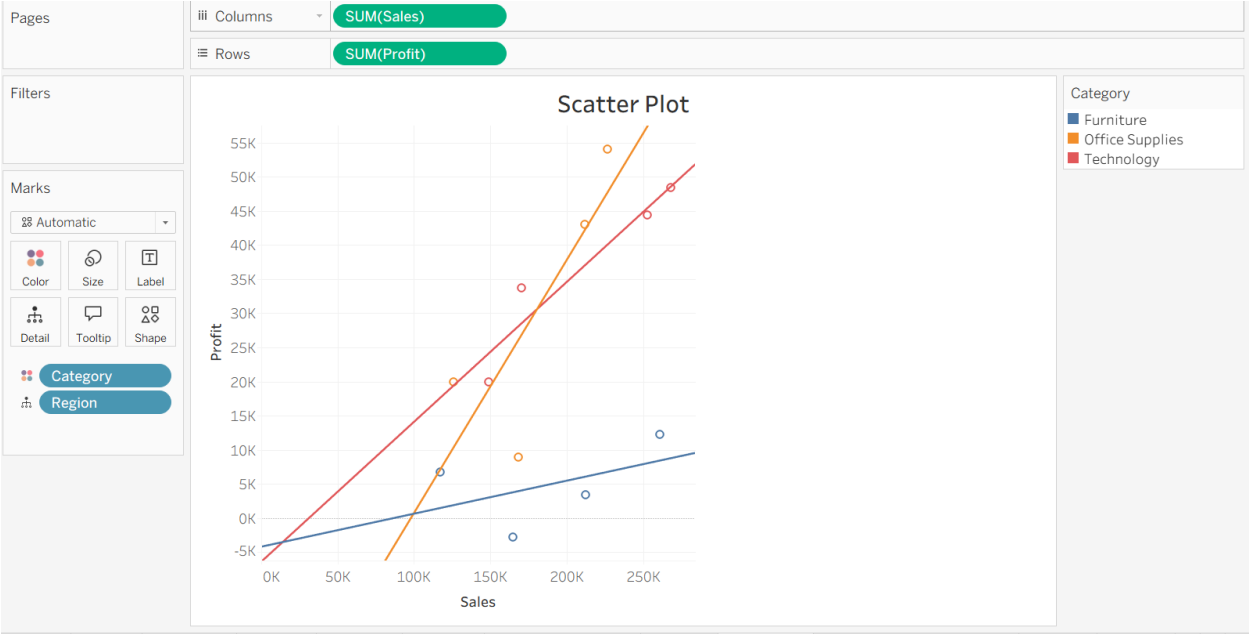

Now more marks appear and each category is divided by:

- ✚ Central
- ✚ East
- ✚ South
- ✚ West
- ✚ Total mark =category *Region

Add Trend Lines

- Now, **click Analytics** Pane and Drag **Trend Line**.
- Now drop it on the **chart** Then, **select: Linear**.

OUTPUT:

BRAVO
— BUILDERS —

Sheet – 11: Text Table with Percentages

- Drag **Order Date** and place it on the **columns shelf**.

Add Sub-category to Rows

- Drag **Sub-category** and place it on the **Rows shelf**.

Now a table structure is created.

- ✚ Rows=sub-categories
- ✚ Columns=Years
- Drag **sales** and place it on the **text** in **marks card**.
- Now, each cell shows: **SUM(sales)** For each **year** and **sub-category**.
- Drag **Region**.
- Then **drop** it on the left side of the **sub-category in rows shelf**.

Now rows become:

- ✚ *Central--->Chairs
- ✚ *Central--->Phones
- ✚ *East--->Chairs
- ✚ *East--->Phones etc...

Convert Sales to Percentages

- Now, right-click **SUM(Sales)** on marks card.
- Select add **table calculation**.

Configure table calculation in dialog box

- Calculation type: percent of total
- Compute using: Pane (down), Then click ok.

Sheet – 13: Donut Chart

Creating the calculated field as zero

- Now go to **analysis menu** and select **create calculated field**.
- Name the **field as Zero**
- Then add the formula area, Type Formula:0
- **Click okay.**

Zero to Rows

- Drag **zero** to the **rows shelf**.
- Now **zero** will be added in the **measures section**.

Convert to Pie

- Click **size** in the **marks card** and select the **Pie**.
- From the toolbar, choose fit **entire view** to get the clear larger pie.

Create Second Pie for Donut Hole

- Again drag Zero from Measures to the Rows shelf.
- Place it on the right side of the First Sum(Zero).

Create Dual Axis

- Right click on the SUM(zero) in row.
- Then select dual axis. Now both the pie charts overlap.

Create the inner circle

- Click the second SUM(zero), in the **marks card**.
- Click **size** and reduce the size slightly and click **color**.
- Select the **white color** to get the clear **Donut chart**.

Add Region Colors

- Now click the first SUM(zero) on the **marks card**.
- Then drag the **region** to color.

- Each region gets different color.

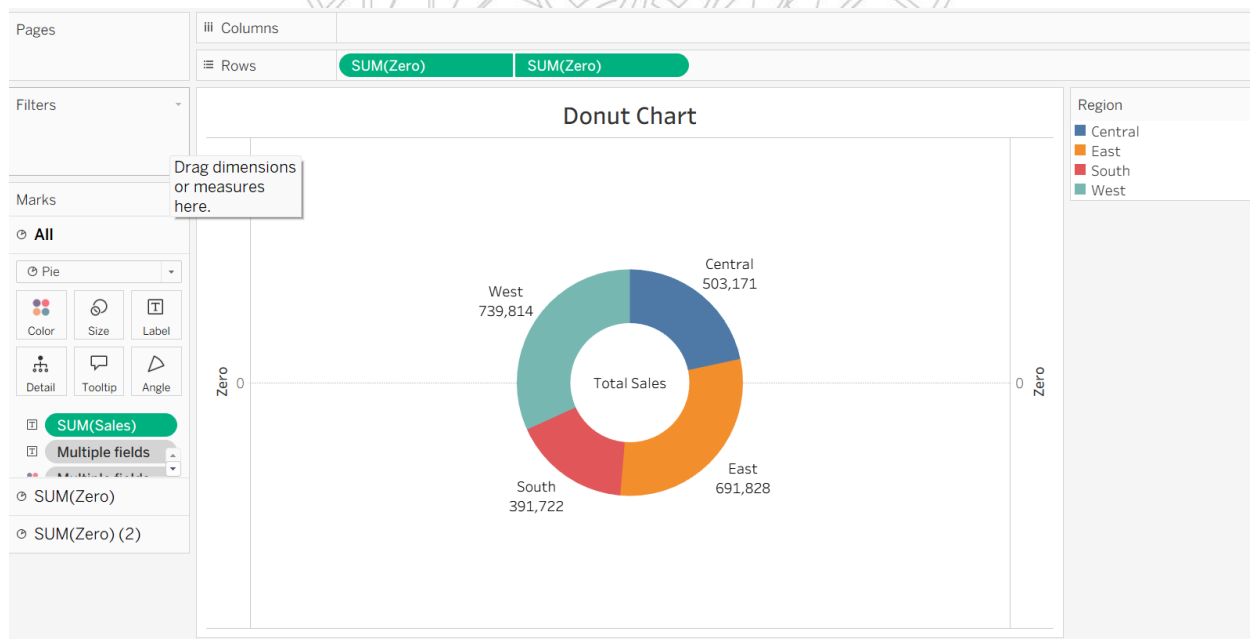

Add labels.

- Drag **region**, **sales** and place it on the label in **marks card**.
- Drag **sales** to Angle.

Add Total Sales in Center

- Click the second **SUM(Zero)** in **marks card**.
- Drag **sales** to the label.
- Click **label Text** and click the **three dots (...)** beside the text editing.
- Type: Total sales, Select **ok**.

OUTPUT:

— BUILDERS —

Sheet – 14: Map Chart

Creating the basic map

- From the **data pane** and Drag **state** to the workspace.
- Then the **tableau automatically generates a map** using latitude and longitude.

Add Sales Information

- Drag **sales** and place it on the color in **marks card**.
- Now the **map** displays sales values with **different color**.

Change Map Type

- Mark card, click the **automatic**.
- Next select map or filled map.
- Shows circles on locations and Filled Map Fills states with colors.

Edit colors:

- Click **color** on the **marks card**.
- Then choose a **color palette (purple)** Click ok.

Add labels

- Drag **state** to label and again drag **state** to label.
- Now each **state** shows its sales value.

Add Region

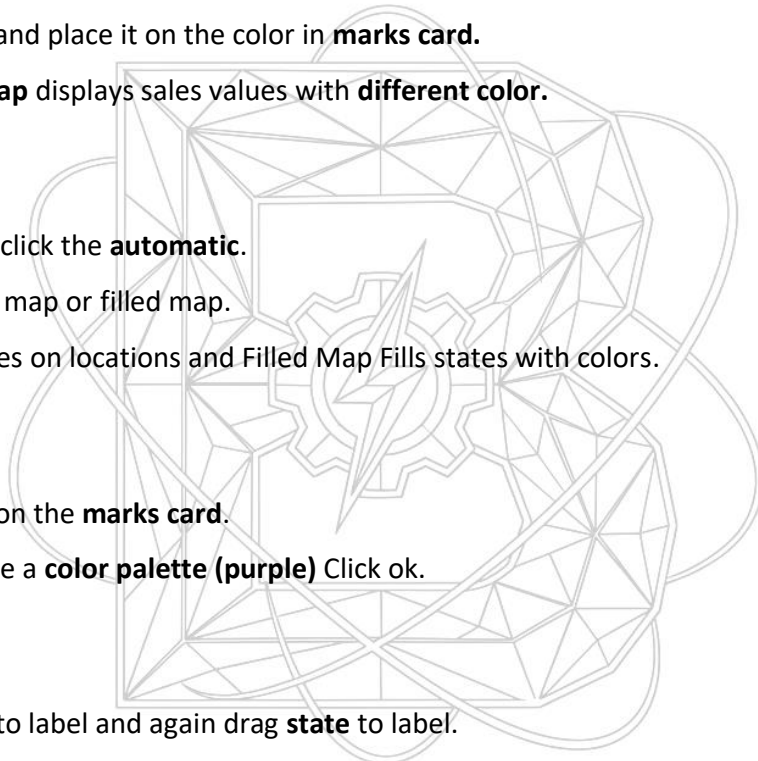

- Drag **region** to the **filters shelf**.
- Select all region and click ok.

Add Profit Details

- Drag **Profit** to Tooltip.

Format the Map

- Go to Map--->Map layer.
- Adjust:
