

Strategic Product Placement Analysis

TEAM ID	SWTID-2026-5123
PROJECT TITLE	Strategic Product Placement Analysis
MAX MARKS	4 MARKS

3.4 – Technology Stack

Python, Tableau Desktop, PyCharm, Git, Microsoft Word, Excel/CSV Datasets, Windows 10/11. The Strategic Product Placement Analysis project uses data analytics, visualization, and development tools to evaluate product placement strategies and sales performance. Python is used for data analysis, Tableau Desktop for creating interactive dashboards and visualizations, and PyCharm for development. Git supports version control, while Microsoft Word is used for documentation and report preparation. These technologies help in efficient data analysis, visualization, and decision-making.

Hardware Requirements

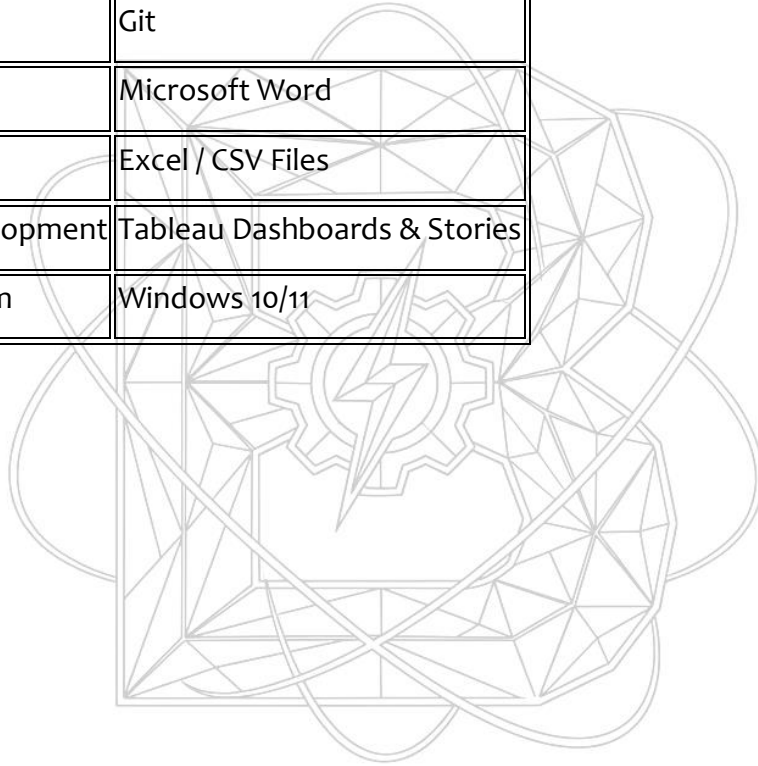

- Processor: Intel Core i5 Processor
- RAM: 8 GB
- Storage: 256 GB SSD

Software Requirements

- Tableau Desktop – Data visualization and dashboard creation
- Python – Data analysis and processing
- PyCharm – Python development environment
- Git – Version control and project management
- Microsoft Word – Documentation and report preparation

Technology Stack Summary

Component	Technology Used
Data Visualization	Tableau Desktop
Programming Language	Python
IDE	PyCharm
Version Control	Git
Documentation	Microsoft Word
Data Source	Excel / CSV Files
Dashboard Development	Tableau Dashboards & Stories
Operating System	Windows 10/11
